M12 PRO

INDUSTRIAL LOGISTICS

Zallys M12 PRO is equipped with an **electric tilting system** and is also set up for the connection of **electric accessories**, with controls installed in the tillerhead.

This electric pedestrian tug can pull, push and steer wheeled loads up to 1500 kg (with ballasts), reducing manual handling and speeding up all related works.

Very effective and easy to use, its electric accessories are activated directly from the tiller head, for the maximum comfort of the user during coupling and uncoupling operations.
