REMOTE
CONTROL

AIRPORT LOGISTICS

Zallys M12 R with remote control is a compact and practical electric tug suitable to work as airport cart mover.

Equipped with a remote control, is ideal to be used inside and outside airports, even on slopes: thanks to its reduced dimensions it can easily tow cart trains in narrow spaces, such as moving walks and corridors.

The remote control allows a single operator to move several carts at once, controlling their direction with a single hand.
