DUMPER JET

CONSTRUCTIONS

Zallys DUMPER JET L is a professional electric wheelbarrow designed to work with loads up to 500 kg (1.100 lb).

The semi-automatic tilting is helped by an electronic system, which controls the forward/backward speed through a knob accelerator.

This makes the discharge safe and practical even indoor, where DUMPER JET is the ideal solution thanks to its respect of the anti-pollution normative about noise and exhaust fumes emission.
